

Statistical Analysis of ISMB Coverage at FriendFeed 2008 - 2011

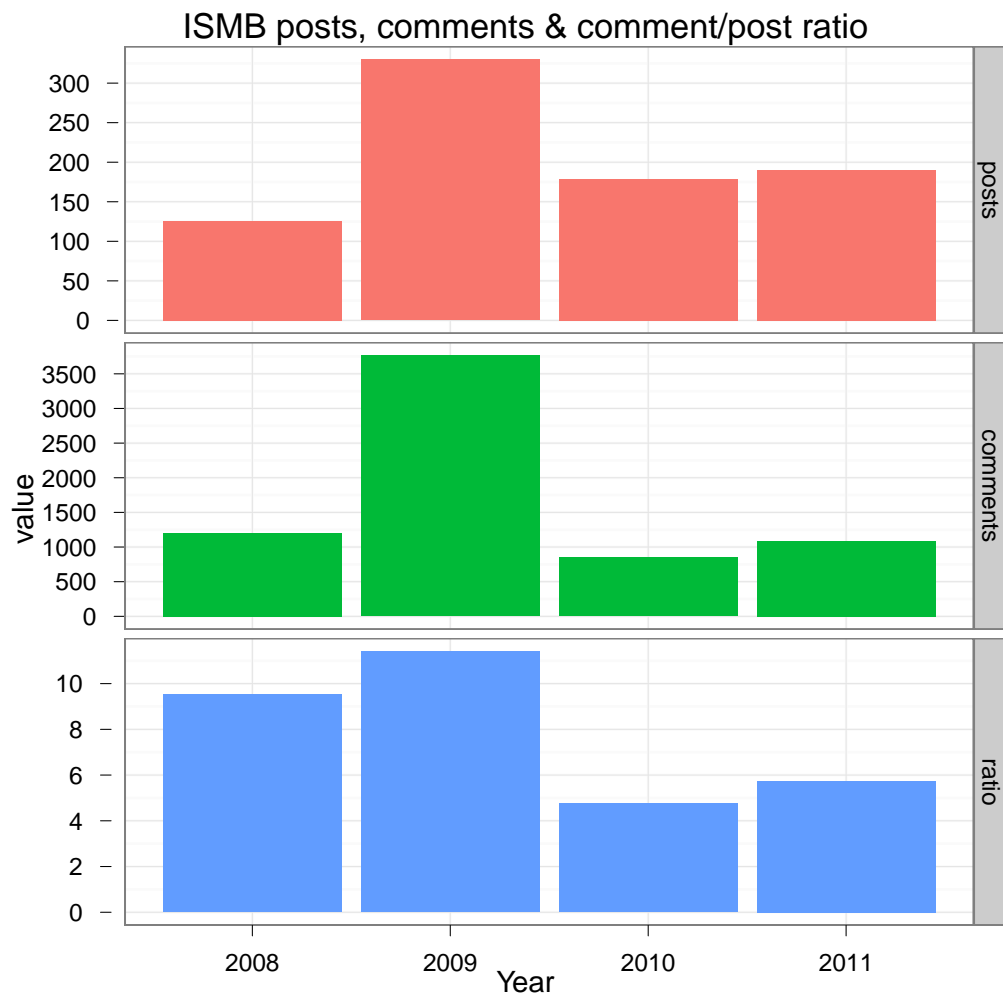

Neil Saunders

July 27, 2011

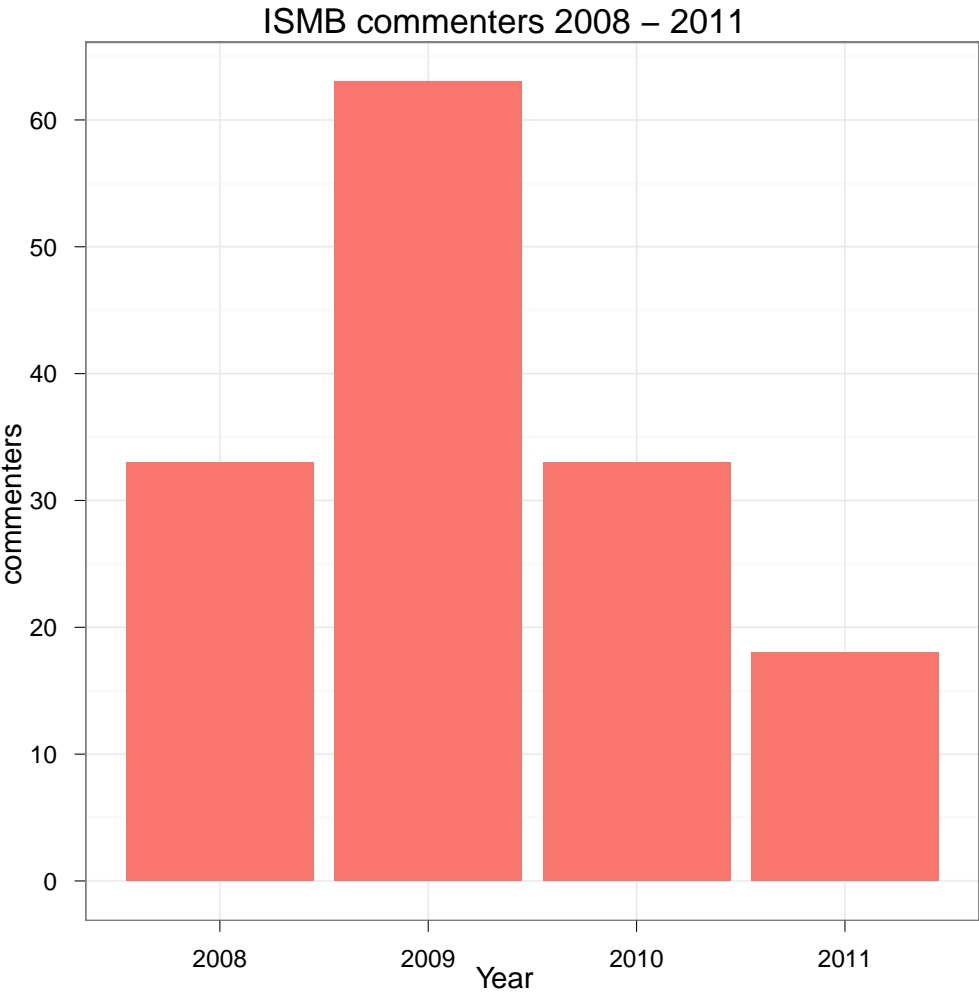

Abstract

This document analyses coverage of the ISMB conference at FriendFeed, from 2008 to 2011.

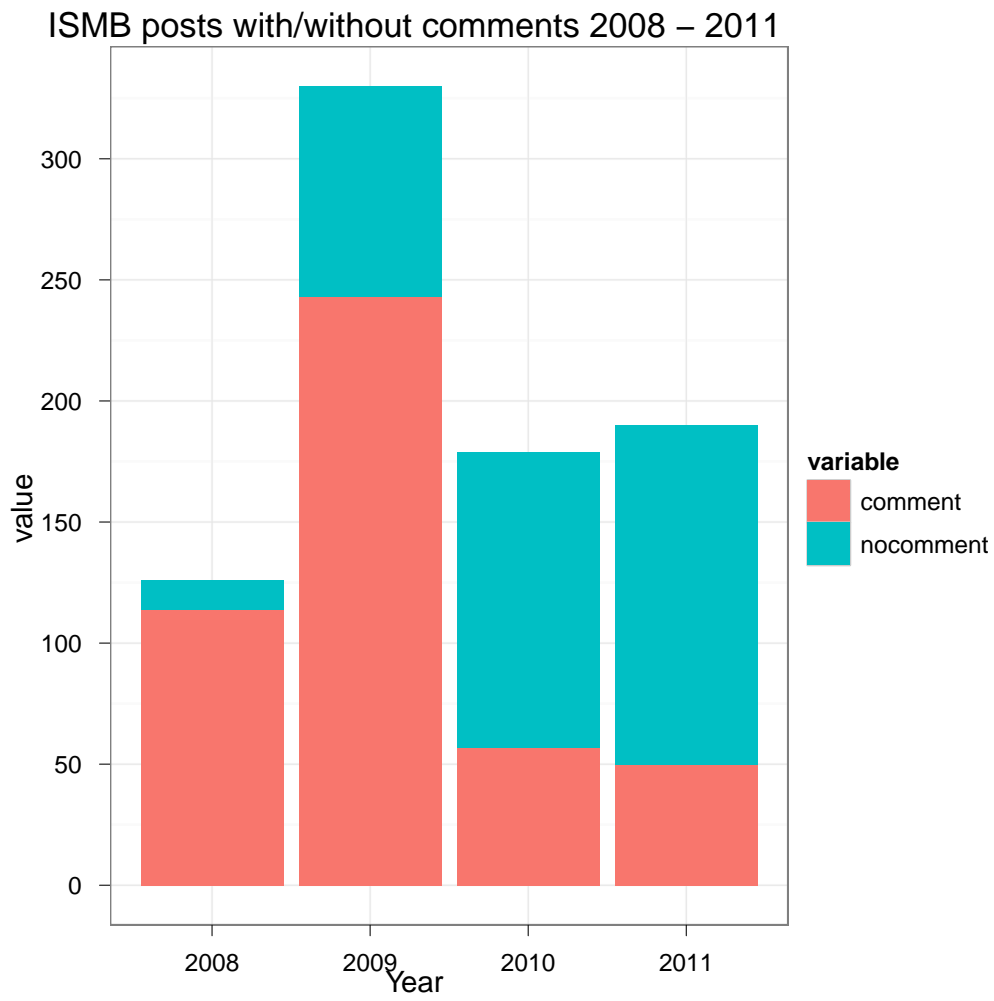

1 Posts, comments and comment/post ratio

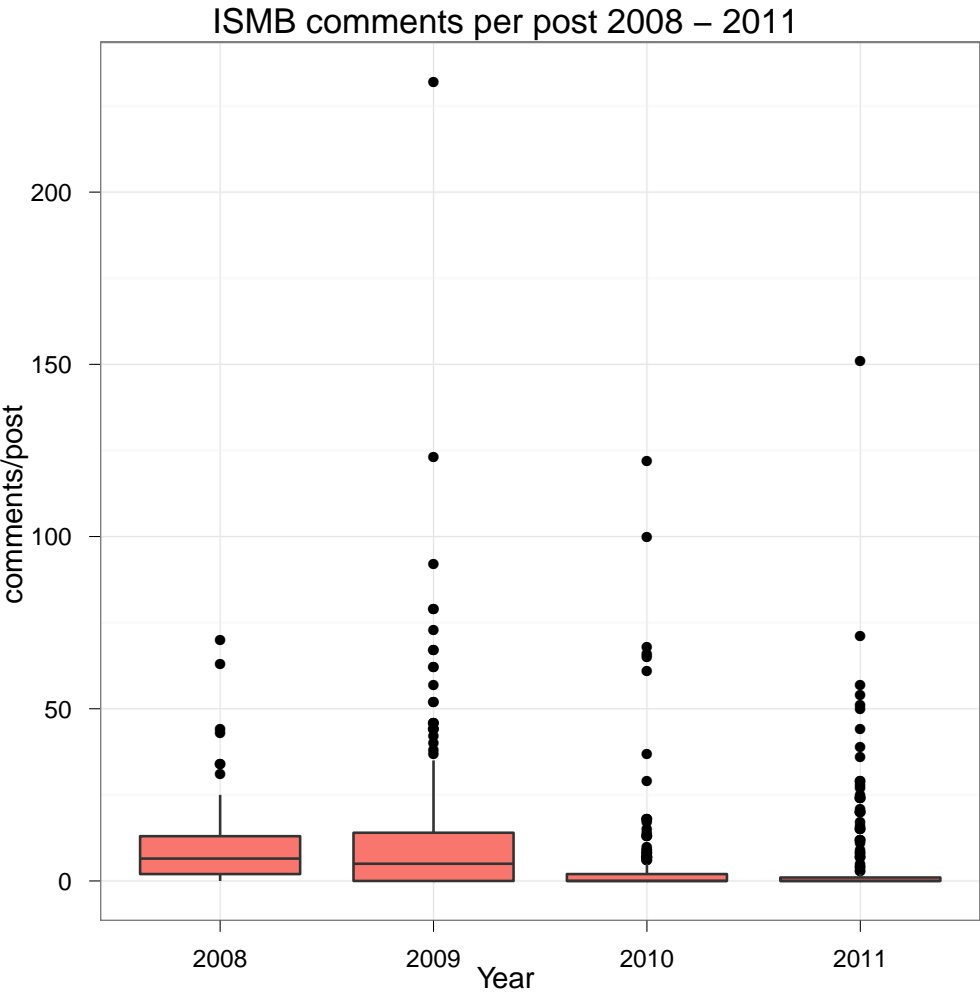

2 Participants who commented

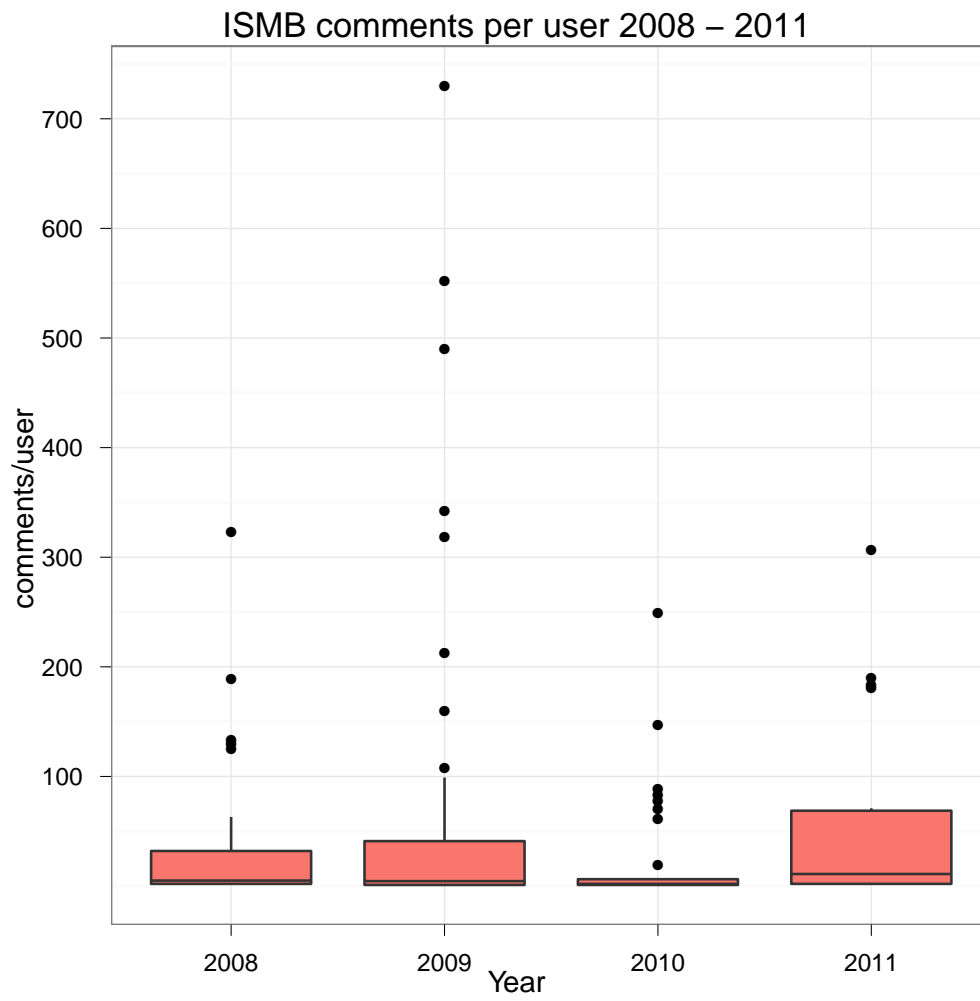

3 Posts with/without comments

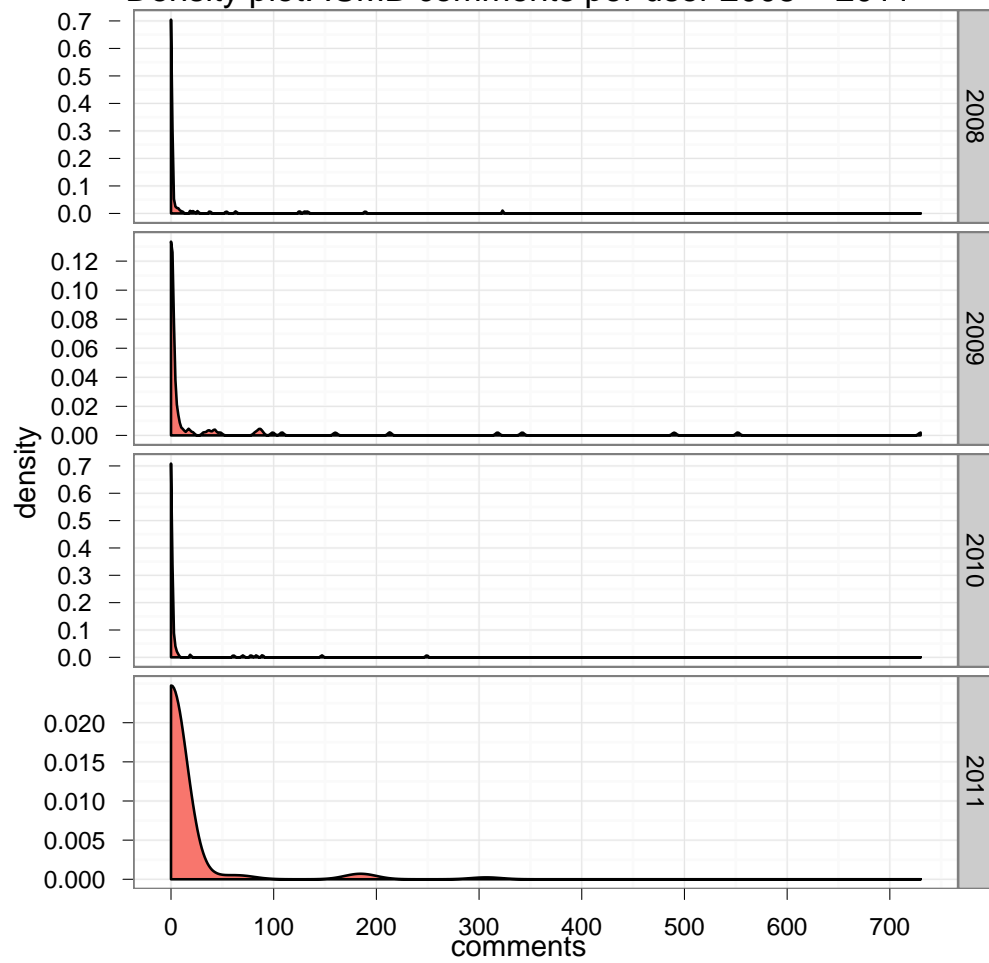

4 Comments per post

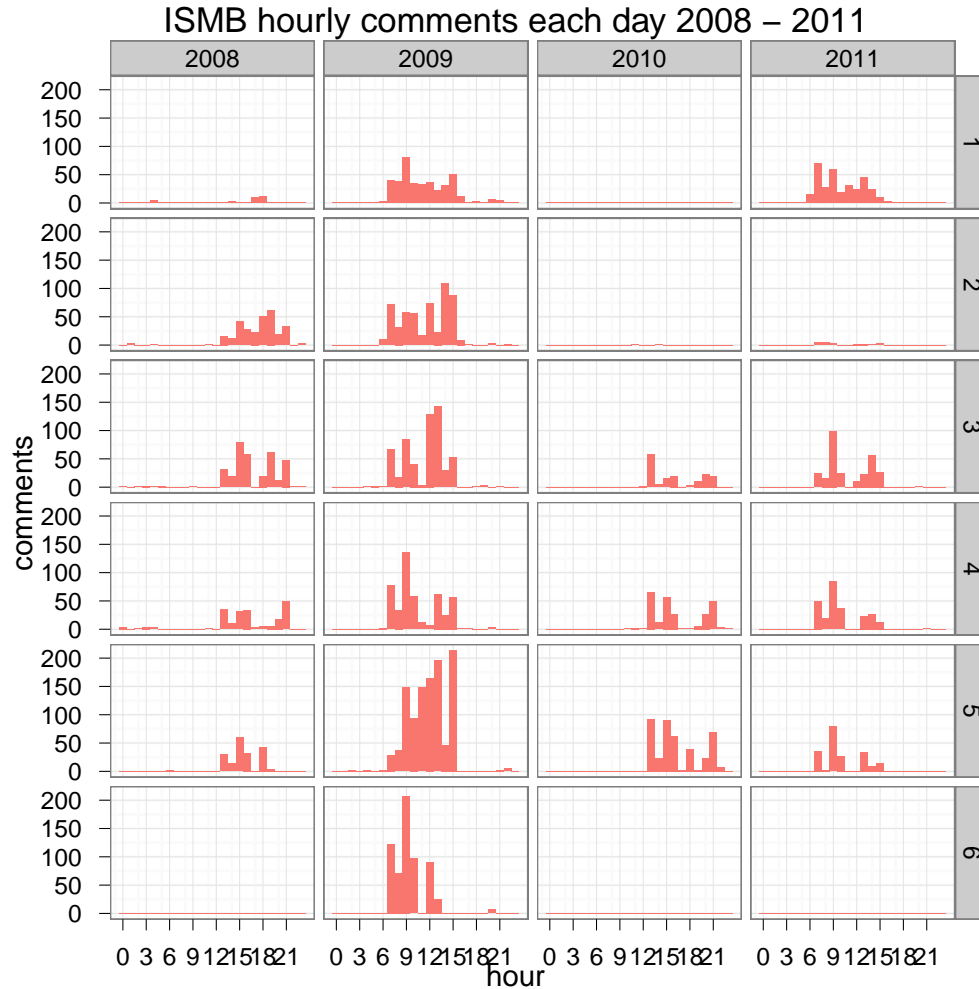

5 Comments per user

Density plot: ISMB comments per user 2008 – 2011

6 Comments timeline

7 Most popular posts

| year | body | comments |
|------|---|----------|
| 2009 | Keynote: Thomas Lengauer - Chasing the AIDS Virus | 232 |
| 2011 | SNP-SIG: Identification and annotation of SNPs in the context of structure, function, and disease | 151 |
| 2009 | Keynote: Mathias Uhlen - A global view on protein expression based on the Human Protein Atlas | 123 |
| 2010 | PLoS Session on How to Write a Good Paper | 122 |
| 2010 | Keynote: David Altshuler - Genomic Variation and the Inherited Basis of Common Disease | 100 |
| 2009 | Keynote: Webb Miller - Bioinformatics Methods to Study Species Extinctions | 92 |
| 2009 | Keynote: Daphne Koller - Individual Genetic Variation: From Networks to Mechanisms | 79 |
| 2009 | Special Session 6: Regulatory Genome Architecture and Noncoding Mutations in Human Disease | 79 |
| 2009 | Birds of a Feather session: Semantic Web-Linked Data, organized by Eric Neumann, in T5 | 73 |
| 2011 | Network Biology SIG: On the Analysis and Visualization of Networks in Biology | 71 |
